# Comment to picture above  
 # We can see out QFT function has worked correctly. Compared the state {zero in QFT basis}  $|0^{\sim}\rangle = |+++\rangle$ ,  
 # Qubit 0 has been rotated by  $5/8$  of a full turn, and  
 # qubit 1 has been rotated by  $10/8$  full turns (equivalent to  $1/4$  of a full turn),  
 # qubit 2 has been rotated by  $20/8$  full turns (equivalent to  $1/2$  of a full turn).

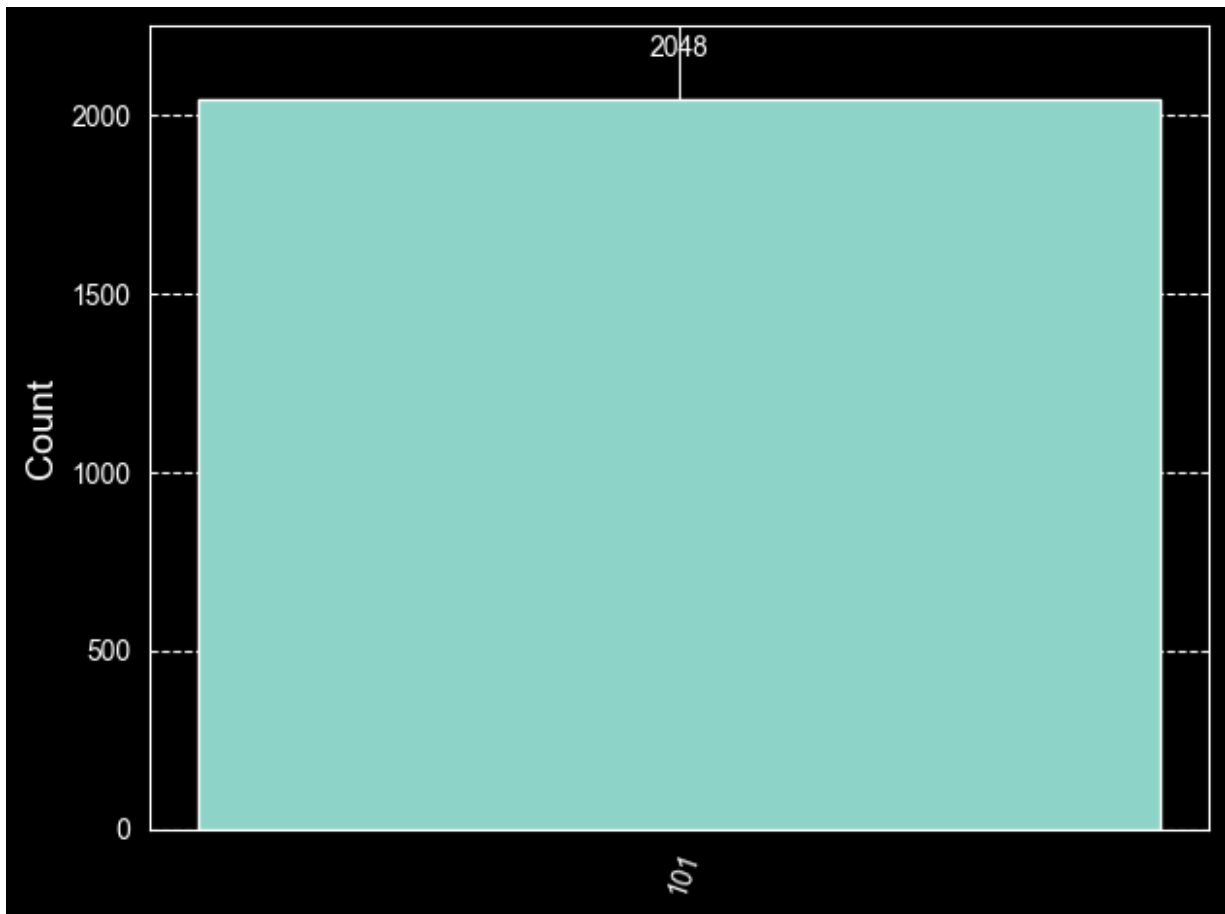

```
